

2 improvs About car-sharing  
Caise 2012 - Gdansk

Rainy day in Busy London

Synopsis

- Business people waiting the bus, it rains, bus does not come
- One overhears they go to the same place
- They share umbrella
- They detect through the system that one of them has a friend who goes near there
- After some communication problems, they send a message, and that friend comes pick the 3 up
- She was already with someone, so have to explain him she goes there, he accepts
- The enter the car
- Another driver comes to pick the same people, but they are not there anymore

Discussions

- Too many demand, too few offer: what do we do ?
- Become "car-sharing-friends" through proximity
- Put people demanding the same ride together, send only one request for both...
- Cancel requests when accepted by another person
- Driver broadcast signal that they drive from A to B
- Trust of the system ? Reliability ?

Idea

bring analogy from taxi driver coordinatior

About improv

- Quite long, quite good
- One of the leader was "abandoned" so felt a bit frustrated, without really understanding why
- Finally 6 people get in without it being a mess: quite impressive for such beginners...

I want to Party Tonight

Discussion

- Synopsis
  - 2 women go to the same party
  - One wants to get drunk, so can't drive, but has a car
  - Through the system, they arrange that she will then let the other drive her own car
- Discussion
  - You have a car, but don't want to be the driver
    - Hate parking
    - Weather conditions
    - Lost license for some reason
    - Don't like to drive at night
    - Don't know the directions, the way (foreigner)
  - Possibility to be partly sharing (not on the full traject, not necessarily the same destination)
  - Matching people who have something in common
  - Use social networks to put people in touch
  - Use proximity networks Technology is discussed about this
  - Matching based on event registration
  - GPS localization to prevent commincating localisation data
  - Privacy Choose information you want to disclose (preferences, location...
  - Safety See picture to feel safe
  - See picture to recognize and meet
  - Evaluation (reputation-based) multi-criteria
  - Referencing by friends Discussing technology
  - Dating possibility
  - What are you wearing ?

About Improv

- Lot of fun duting improv and discussion
- Audience shouts ideas to players during improv
- Quite short
- discussion flows very naturally after improv
- "Did not think about htis originally, but it came to both of us at the same time"

Feedback

- Want to have documentation: a mindmap ;-)
- Really natural way to force people to collaborate
- Must be very interesting with stkh with different backgrounds
- Maybe use a more complicated example ("I had an idea of it in advance")
